

Archive Mikrobiologisches Kolloquium (2000-2006)

2006

20.12.2006

Prof. Dr. Gert Hansen, Kopenhagen

Lipid rafts in the intestinal brush border membrane

13.12.2006

Prof. Dr. Ruth Schmitz-Streit, Kiel

Nitrogen regulation in *Klebsiella pneumoniae* and *Methanosarcina mazei*

06.12.2006

Dr. Cécile Bouton, Gif-sur-Yvette

Iron-sulfur clusters as key regulatory elements: the bifunctional Iron Regulatory Protein-1

22.11.2006

Prof. Dr. Hubert Bahl, Rostock

Clostridium acetobutylicum: analysis of stress responses and prospects of this „old“ industrial microorganism

15.11.2006

Dr. Markus Moll, Stockholm

The CD1 system – New target for HIV-1 immune evasion

08.11.2006

Prof. Dr. Jean-Marc Moulis, Grenoble

Iron sensing in animal cells: mechanisms modulating Iron Regulatory Proteins activities

01.11.2006

Prof. Dr. Michael Blaut, Potsdam

Influence of Intestinal Bacteria on the Bioavailability of Dietary Polyphenols

25.10.2006

Prof. Dr. Wilfried Weissenhorn, Grenoble

Structural biology of enveloped virus assembly machines

19.07.2006

Prof. Dr. Jürgen Roth, Zürich

Life and death of misfolded proteins: a microscopist's-eye view of protein quality control

05.07.2006

PD Dr. Gert Zimmer, Hannover

The respiratory syncytial virus (RSV) F protein - more than a fusion protein

28.06.2006

Prof. Dr. Jörg Overmann, München

Interactions in the microbial world: phototrophic consortia as model systems

21.06.2006

Prof. Dr. Werner Solbach, Lübeck
Title to be announced

14.06.2006

Prof. Dr. Nicole Frankenberg-Dinkel, Bochum
To see or not to see? Vision in bacteria

07.06.2006

PD Dr. Stephan Urban, Heidelberg
Towards a molecular understanding of the early events of Hepatitis B Virus infection:
Entry inhibition as a novel therapeutic concept for the treatment of chronic hepatitis
B?

31.05.2006

Prof. Dr. Dieter Jahn, Braunschweig
Enzymes of the bacterial tetrapyrrol synthesis

24.05.2006

Prof. Dr. Gottfried Uden, Mainz
Bacterial Sensors of Oxygen and Fumarate

17.05.2006

Prof. Dr. Petra Dersch, Braunschweig
Enteropathogenic Yersinia: different strategies to interact with human cells

10.05.2006

Prof. Dr. Martijn A. Huynen, Nimegen, NL
Comparative genomics for reliable and specific protein function prediction: focus on
the mitochondrial proteome

03.05.2006

Prof. Dr. Jörg Stülke, Göttingen
Carbon metabolism in Mycoplasma pneumoniae: Regulation and relation to
pathogenicity

26.04.2006

Prof. Dr. Michael Ristow, Jena
Mitochondrial Metabolism and Common Mammalian Disorders

19.04.2006

Prof. Dr. Erko Stackebrand, Braunschweig
How unique is unique - diversity among procaryotes

08.02.2006

Prof. Dr. Lutz Schmitt, Düsseldorf
Type I secretion in E. coli - The ABC-transporter pathway"

25.01.2006

Prof. Dr. Jan Remmer Anreesen, Halle-Wittenberg
Tungstate binding as first selective step in tungstopterin cofactor biosynthesis

11.01.2006

Prof. Dr. Johann Heider, Darmstadt

Between rock oil and a hard place: bacterial hydrocarbon metabolism without oxygen

2005

21.12.2005

Prof. Dr. Klaus Brehm, Würzburg

The fox-tapeworm *Echinococcus multilocularis*: molecular cross-talk between host and parasite in helminth infections

14.12.2005

Prof. Dr. Roland Benz, Würzburg

Structure and function of cell wall channels from *Mycobacteria*

07.12.2005

Prof. Dr. Michael Thumm, Göttingen:

Autophagy- more than just another transport pathway

30.11.2005

Prof. Dr. Karl-Erich Jäger, Jülich

Novel biocatalysts from bacteria

23.11.2005

Prof. Dr. Martijn A. Huynen, Nimegen, NL

Comparative genomics for reliable and specific protein function prediction: Applications to the proto-mitochondrial proteome

16.11.2005

Prof. Dr. Wolfgang Nellen, Kassel

Antisense, RNA interference and chromatin remodeling in *Dictyostelium*: three sides of a coin?

09.11.2005

Prof. Dr. Nigel M. Hooper, Leeds UK

Proteolytic processing and targeting of cell-surface peptidases - ACE and ACE2

02.11.2005

PD Dr. Matthias Boll, Freiburg

Aromatic metabolism in facultative and obligate anaerobes

26.10.2005

Prof. Dr. Katja Becker, Gießen

Redox networks in malarial parasites: peculiarities and therapeutic potential

13.07.2005 Prof. Dr. Michael Hecker, Greifswald

From the genome sequence to life: Physiological proteomics of *Bacillus subtilis*

06.07.2005

Prof. Dr. Markus Ribbe, California

Biosynthesis of nitrogenase

29.06.2005

Dr. André Le Bivic, Marseille

Regulation of the molecular and spatial composition of tight junctions in human intestinal cells

22.06.2005

Prof. Dr. Trinad Chakraborty, Gießen

From the environment to infection: genomic views of evolution and adaptation by *Listeria monocytogenes*

15.06.2005

Dr. Michael Rother, Frankfurt

Carbon monoxide metabolism in *Methanosarcina acetivorans*: Surprising physiological and genetic flexibility

08.06.2005

Dr. Michèle Bouloy, Paris:

Rift Valley fever virus: the strategy utilized by the non-structural protein NSs to counterattack the host cell responses

01.06.2005

Prof. Dr. Rolf Müller, Saarbrücken

Bacterial genomics and natural products research: Myxobacteria and their potential to produce bioactive molecules

25.05.2005

PD Dr. Stephan Günther, Hamburg

Molecular epidemiology and reverse genetics of Lassa virus

18.05.2005

Prof. Dr. Karl Forchhammer

Nitrogen control in cyanobacteria

11.05.2005 Prof. Dr. Klaus Hantke, Tübingen

Bacterial iron transport systems and the new siderophore salmochelin

04.05.2005

Prof. Dr. Franz Narberhaus, Bochum: Structure and function of RNA thermometers

27.04.2005

Dr. Bernd Masepohl, Bochum

Regulation of nitrogen fixation in phototrophic bacteria

20.04.2005

Prof. Dr. Charles E. Samuel, Santa Barbara, California

ADAR and PKR, and double-stranded RNA as a molecular trigger in the antiviral mechanisms of interferon action

13.04.2005

Prof. Dr. Ralf R. Mendel, Braunschweig: Cytoplasmic Fe-S clusters are essential for biogenesis and functioning of molybdenum enzymes in plants

09.02.2005

Prof. Dr. Wolfgang Liebl, Göttingen

Life in hot acid- implications from the genome sequence of the extreme thermoacidophile *Picrophilus torridus* about how ot thrive around pH 0

02.02.2005

Prof. Dr. Peter Rottier, Utrecht, NL

Coronaviruses

26.01.2005

Dr. Rolf Daniel, Göttingen

Metagenomics: a way to explore and to exploit the unknown

19.01.2005

Prof. Dr. Hans-Georg Kräusslich, Heidelberg

Endosomal involvement in HIV entry and release

12.01.2005

Prof. Dr. Gabriele Klug, Gießen

Eyes of blue: how bacteria sense light

2004

15.12.2004

Dr. Thomas Wiegert, Bayreuth

Proteases in concert- Stress induced degradation of the *Bacillus subtilis* anti-sigma factor RsiW

08.12.2004

Prof. Dr. Volkmar Braun, Tübingen

Transcriptional control by cell surface signaling in gram- bacteria

01.12.2004

Prof. Dr. Jan Tachezy, Prag

Iron-sulfur cluster assembly in "amitochondrial" protists

24.11.2004

Dr. Holger Brüggemann, Paris

Pathogenomics of *Clostridium tetani* and other clostridial species

17.11.2004

Prof. Dr. Ulrich Göringer, Darmstadt

Titel wird noch bekannt gegeben

10.11.2004

Prof. Dr. Hermann Müller, Leipzig

Avian Polyomaviruses

03.11.2004

Dr. Kai Matuschewski, Heidelberg

Hitting the Malaria Life Cycle early on: Attenuated *Plasmodium* Liver Stages

27.10.2004

Prof. Dr. Lotte Sogaard-Andersen, Marburg

Multiple signal transduction pathways converge to control fruiting body morphogenesis in *M. xanthus*

20.10.2004

Prof. Dr. Ida van der Klei, Haren, NL

Peroxisome biogenesis and degradation in the yeast *Hansenula polymorpha*

21.07.2004

Frau Prof. Dr. Ursula Priefer, Aachen

Expression and regulation of rhizobial nitrogen fixation genes in symbiosis with leguminous host plants

14.07.2004

Prof. Dr. George Brownlee, Oxford

New insights into regulation of transcription and replication of influenza virus genes

07.07.2004

Dr. Xavier Perret, Genf

Control of symbiotic gene expression in the broad host-range *Rhizobium* sp. NGR234

30.06.2004

PD Dr. Christof von Eiff, Münster

Staphylococcus aureus Small colony Variants: A link to persistent and relapsing infections

23.06.2004

Prof. Dr. Andreas Peschel, Tübingen

The staphylococcal cell envelope: synthesis, function and role in infections

16.06.2004

Frau Dr. Julia Fritz-Steuber, Zürich

Na⁺-translocating NADH Dehydrogenases: a clue to mitochondrial complex I

09.06.2004

Dr. Dirk Schueler, Bremen

The biomineralization of magnetosomes in magnetotactic bacteria

02.06.2004

Prof. Dr. Herbert Schmitz, Hamburg

Type-specific immune response to different isolates of Lassa virus

26.05.2004

Prof. Dr. Eckhard Mandelkow, Hamburg

Structure of the motor protein kinesin and interactions with microtubules

19.05.2004

Prof. Dr. Ulrich Brandt, Frankfurt

A Big Machine to Pump Small Ions: Structural and Functional Insights into Proton Pumping Complex I of Mitochondria

12.05.2004

Prof. Dr. Gerhard Drews, Freiburg

Aerobic, phototrophic bacteria- a strange product of evolution

05.05.2004

Prof. Dr. Richard Plemper, Atlanta

A Novel Target Site for Template-based Design of Paramyxovirus Entry Inhibitors

28.04.2004

Prof. Dr. Dietrich Mack, Hamburg

Staphylococcus epidermidis and biofilms: molecular mechanisms and significance for pathogenicity

21.04.2004

Dr. Frédérick Barras, Marseille

Biogenesis of iron-sulfur cluster-containing proteins in Escherichia coli

18.02.2004 Frau Dr. Blache Schwappach, Heidelberg

14-3-3 proteins in the assembly of ATP-sensitive potassium channels 04.02.2004

PD Dr. Ralph Graf, München

Centrosomal microtubule plus-end complex proteins and their role in Dictyostelium cell dynamics

28.01.2004

Prof. Dr. Klaus Aktories, Freiburg

GTPase-modifying bacterial toxins

14.01.2004

Frau Dr. Wilma Ziebuhr, Würzburg

Impact of insertion sequences on generation of phenotypic and genetic diversity in pathogenic Staphylococcus epidermidis

2003

17.12.2003

PD Dr. Andreas Brune, Marburg

World's smallest bioreactors: Microbiology of the termite gut

10.12.2003

Dr. Mark van der Giezen, London

Hydrogenosomes, mitochondria and early eukaryotic evolution

03.12.2003
